

# Digital Wireless Baby & Family 2.4 inch Monitor System

The wireless video & audio monitoring system - that grows with your family.

This AE Wireless Digital Baby & Family Monitoring System (DBFMS) is the latest advance in digital video technology. Our newly developed video 'chip' allows you to watch over your loved ones with superb picture and sound quality, with secure transmission up to a range of 250 meters (clear sight); setup takes under 5 minutes.

The DBFMS consists of a 2.4 inch digital Colour Monitor with day and night-vision Camera. You can add an additional 3 Cameras in different locations. This enables you to see, hear and talk to your baby and other loved ones anywhere in your home.

The additional Cameras can be registered and securely locked into the Monitor. You can then select each Camera location separately. For those 'memorable moments' you can Record and capture the images with sound as a video through your television onto any recording device on a computer.

The AE Wireless Digital Monitor is light, compact and portable, and lets you monitor your baby and other loved ones anywhere as you move around your home.

Watch over your loved ones while they sleep, rest & play.

REMINDER: The DBFMS is not intended to replace the responsibility of parental supervision and/or carers.
